

# *Advertising Database Publication Catalog Print-On-Demand*

Ads, catalogs and database materials created in various programs such as Quark, Photoshop, FileMakerPro, etc. are processed through Adobe Acrobat for easy emailing, website posting, printing and professional publication by local and on-the-road product and sales representatives. Specifics such as resolution, password protection, printing, selection, and exporting permissions are fully customizable and Acrobat pages are truly cross-platform.

*This mini-catalog was printed on-site, at an international gift & decorative accessories preview show. An interior designer recently contracted by a major retail chain came to the booth with handwritten notes and pencil sketches of themes she'd taken over the phone from her boss that morning. They had been given a last minute audience with corporate board members to present their plans the following day when the show "officially opened"*

*The designer and sales rep combed the showroom, found her matches, entered the item numbers into the database and printed fifteen of these theme-ordered, customized catalogs within one hour.*

*Just another highlight to the advantage of database-driven, print-on-demand catalogs and sales materials!*
